NNAMDI AZIKIWE UNIVERSITY, AWKA
DEPARTMENT OF COMPUTER SCIENCE
CSC 202 EXAMS JAVA PRG. 09/08/2016
INSTRUCTION: ANSWER ALL QUESTIONS TIME: 50 MINS

1. JAVA Class consists of ------ and ------
a.) State and Variables (b) Behaviour and Methods (c) Variables and Methods (d) Objects and Characteristics (e) All of the Above
2. To compile Java source code, we make use of ------- file
a.) Netbeans (b) IDE (c) JDK (d) JAVAC (e) JAVA
3. To run Java byte code, we make use of ---------- file
a.) Netbeans (b) IDE (c) JDK (d) JAVAC (e) JAVA
4. API stands for ---------
a.) Application Programming Interface (b) Application Project Interface (c) All purpose Interface (d) Active programming interface
(e) Active project interface
5. ----- provides software and tools required for compiling, debugging and executing java application.
a.) Java Virtual Environment (b) Java Development Kit (c) Java tool kit (d) Java virtual machine (e) Java application interface

Use the program segment to answer questions 6-9

```
1. Public static void main(Strings[ Jargs){
2. int a = 5;
3. int b = 10;
4. int c = 20;
5. int T = a+b+c;
6. double r =(t/2);
7. double w = (r*(r-a)*(r-b)*(r-c)));
8. double area = Math.pow(w,(0.5));
9. System.out.println("Triangle of sides"+a+","+b+","+c+"has");
10. System.out.println("Area = ",+area );}
```

6. Output of line 9 will be
a.) Triangle of sides a,b,c has (b) Area = area (c) Triangle of sides 5,10,20 has (d) Area = 64.04 (e) Area of triangle of sides a,b,c is 64.04
7. The variable r is of what data type and hold what value
a.) Int , 5 (b) Int , 10 (c) double , 5 (d) double , 10 (e) double , 17.5
8. output of line 10 will be
a.) Triangle of sides a,b,c has (b) Area = area (c) Triangle of sides 5,10,20 has (d) Area = 64.04 (e) Area of triangle of sides a,b,c is 64.04
9. w is of what data type and holds what value
a.) Int , 4101.50 (b) Int , -4101.56 (c) double , +4101.56 (d) double , -4101.50 (e) int , 17.5
10. --------- is a fundamental tool for encapsulation
a.) Method (b) Class (c) Class overload method (d) Overload method (e) All of the above
11. -------- illustrates the polymorphic feature of java
a.) Method (b) Class (c) Class overload method (d) Overload method (e) All of the above
12. ------ is a primary tool for supporting abstraction in java
a.) Method (b) Class (c) Class overload method (d) Overload method (e) All of the above
13. When a class extends to another class, java exhibits its ----- feature
a.) Polymorphic (b) Abstraction (c) Overload (d) Encapsulation (e) Inheritance
14. --- --------is a feature that provides statement completion for recognized objects
a.) Intellisence (b) Polymorphism (c) Abstraction (d) Intelligence (e) Inheritance

Use the program segment to answer question 15 – 19

```
1. Public class Tokenexample{
2. Public static void main(String args[]){
3. String S1 = "20,5,6";
4. StringTokenizer y1 = new StringTokenizer(S1, ",");
5. String S1 = y1.nextToken();
6. Int j = newInteger(y1.nextToken()).IntValue() *
   newInteger(y1.nextToken()).IntValue() ;
7. String S2 = "Nnamdi Azikiwe University, Awka";
8. StringTokenizer y2 = new StringTokenizer(S2, ",");
9. System.out.println("First Token : "+y2.nextToken());
10. System.out.println("Second Token : "+y2.nextToken());
11. System.out.println("Third Token : "+y2.nextToken());
12. System.out.println("Fourth Token : "+y2.nextToken());}}
```

15. Output of line 12 will be ----------
a.) First Token : Nnamdi (b) Second Token : Azikiwe (c) Third Token : Awka (d) Fourth Token : Awka (e) Third Token : University
16. Output of line 11 will be ----------
a.) First Token : Nnamdi (b) Second Token : Azikiwe (c) Third Token : Awka (d) Fourth Token : Awka
17. Output of line 10 will be ----------
a.) First Token : Nnamdi (b) Second Token : Azikiwe (c) Third Token : Awka (d) Fourth Token : Awka
18. Output of line 9 will be ----------
a.) First Token : Nnamdi (b) Second Token : Azikiwe (c) Third Token : Awka (d) Fourth Token : Awka
19. Output of line 9 will be
a.) Concatenated token s:2011 (b) Concatenated token s:2030 (c) Concatenated token s:2030 (d) Concatenated token :2011 (e) Concatenated token :2030
20. In a typical Java development environment, the steps taken are:
a. Editor-compile-Bytecode verifier-Class loader- JVM (b) Editor- Class loader- compile-Bytecode verifier- JVM (c) Editor- Class loader- Bytecode verifier- compile- JVM (d) Editor- Bytecode verifier - Class loader- compile- JVM (e) Editor-compile- Class loader- Bytecode verifier-JVM
21. How many data types has Java?
a. 2 (b) 9 (c) 3 (d) 5 (e) 4
22. 32^64 = ?
a. 01100000 (b) 10100000 (c) 10010000 (d) 00101000 (e) 00011000
23. The system variable used by the operating system to locate needed executables from the command line is--?
a. IDE (b) JDK (c) Path (d) utility (e) Netbeans

Scanned by CamScanner

24. The Java compiler generates-- ?
a. Machine code (b) source code (c) object code (d) Bytecode (e) object code
25. Java programs are stored with – extension.
a. Class (b) java (c) javac (d) J2SE (e) JDT
26. 39>>>3?
a. 11000100 (b) 10100101 (c) 10010000 (d) 00000100 (e) 11100100

Use the prg segment to answer questions 27-29

```
Import javax.swing.JOptionPane;
Public class Exams{
Public static void main (string [] args){
String txt = null;
Double x;
txt=JOptionPane.showInputDialog("Enter 1st number");
int a= integer.parseInt(txt);
txt=JOptionPane.showInputDialog("Enter 2nd number");
int b= integer.parseInt(txt);
System.out.printf("Enter the 3rd");
```

27. a, b and x are-- variables?
a. Instance (b) Local (c) Class (d) Method (e) Object
28. The prg segment has –methods?
a. 5 (b) 3 (c) 2 (d) 6 (e) 4
29. ---classes of the Java API were used?
a. 2 (b) 1 (c) null (d) 3 (e) 4

Use the prg segment to answer questions 30-32

```
Import java.util Random
Public class Maths{
Public static void main(string[]args){
Random numb= new Random (System.in)
System.out.print ("Generate a number");
int x= numb.nextInt();
```

30. x is --?
a. Local variable (b) Instance variable (c) Class variable (d) Object (e) Class
31. numb is --?
a. Local variable (b) Instance variable (c) Class variable (d) Object (e) Class
32. Random is --?
a. Local variable (b) Instance variable (c) Class variable (d) Object (e) Class
33. Two or more methods with the same name and different parameters in a particular class is termed?
a. Signature of method (b) Overloading of method (c) Packaging of method (d) Recursing of method (e) Abstract of method
34. The combination of the name and parameter list of a method is termed?
a. Signature of method (b) Overloading of method (c) Packaging of method (d) Recursing of method (e) Abstract of method
35. The Switch statement makes use of --?
a. Labeled break (b) unlabeled break (c) Exit (d) Labeled continue (e) unlabeled continue
36. ---loop continues without control
a. For loop (b) while loop (c) infinite loop (d) do loop (e) Nested loop
37. Functions, procedures, subprograms and subroutine are called?
a. a. Class (b) Object (c) Method (d) Package (e) Modifier

```
import myLibrary.*;
public class ShowSomeClass
{
// code for the class...
}
```

39. What is the name of the java file containing this program?
a.) myLibrary.java (b) ShowSomeClass.java (c) ShowSomeClass (d) ShowSomeClass.class (e) Any file name with the java suffix will do
40. Which of the following is TRUE?
a.) an instance field declared public generates a compilation error. (b) int is the name of a class available in the package java.lang (c) Instance variable names may only contain letters and digits (d) A class has always a constructor (e) The more comments in a program, the faster the program runs.

```
Consider the following code snippet
String river = new String("Columbia");
System.out.println(river.length());
```

41. What is printed?
a.) 6 (b) 7 (c) 8 (d) Columbia (e) river
42. Which is true? A constructor
a.) must have the same name as the class it is declared within (b) is used to create objects (c) may be declared private (d) A and B (e) A, B and C
43. ---- is used to instantiate MyClass?
a.) MyClass mc = new MyClass(); (b) MyClass mc = MyClass(); (c) MyClass mc = MyClass; (d) MyClass mc = new MyClass; (e) it can't be done.

44. Which is true for **submarine.dive(depth);**
a.) depth must be an int (b) dive must be a method (c) dive must be the name of an instance field (d) submarine must be the name of a class (e) submarine must be a method.

45. What is the size of short variable?
a.) 8 bit (b) 16 bit (c) 32 bit (d) 64 bit (e) None of the Above

46. What is the size of char variable?
a. 8 bit (b) 16 bit (c) 32 bit (d) 64 bit (e) 128 bit

47. Which is true of inheritance?
a.) process where one object acquires the properties of another (b) the ability of an object to take on many forms (c) inheritance is a technique to define different methods of same type (d) None of the above.
48. Which of the following is true about public access modifier? The Variables, methods and constructors can be accessed by ----
a.) any class (b) any class lying in same package (c) its child class, if declared in the super class (e) None of the above.
49. Method Overloading is an example of
a.) Static Binding (b) Dynamic Binding (c) Both of the above. (d) None of the above.
50. What is byte code in the context of Java?
a.) generated by a Java compiler (b) generated by a Java Virtual Machine (c) another name for a Java source file (d) code written within the instance methods of a class (e) generated by class loader

Scanned by CamScanner
